FRONT COVER ACKNOWLEDGEMENTS

Sketched by

Patricia M. Beaulieu

ACKNOWLEDGEMENTS

Sincere thanks are extended to Maps By Duff for producing the associated road maps. George Duff was assisted by Maureen Osborne and Marilyn Pseifer in the tedious task of transferring road inventory data from field maps onto map mylars and providing the finest drafting skills for this project.

I am most grateful to Lorna Valkenburg for the many hours spent typing and proof-reading the numerous drafts of this catalogue.

A special thanks is extended to Don Bernier and support staff in Forestry Branch that spent countless hours duplicating Universal Transverse Mercator (U.T.M.) maps, producing map mylars and blueprinting maps from mylars for this project. The U.T.M. maps produced by Forestry Branch provided most of the baseline information for this inventory.

I would like to express my appreciation to the Hudson Bay Regional staff for their utmost support in this project.

MacMillan Bloedel (Hudson Bay) Limited and Simpson Timber Company (Hudson Bay) personnel were most helpful in providing information for this project.

Syd Barber provided guidance during the project and editing assistance in the final preparation of this catalogue.

FOREWORD

The inventory and cataloguing of roads in the Hudson Bay Region is an extension of a major effort to inventory roads in the entire Commercial Forest of Saskatchewan. This massive project commenced in 1983, when Wildlife Branch undertook the evaluation of the effect of forest access on big game populations. An experimental road closure program demonstrated that extensive forest access is deleterious to big game, particularly moose and elk, and that vehicle access restriction could serve as management strategy to restore depleted populations. The baseline information accrued from the road inventory will be used to develop a road retirement plan to assist in forest big game restoration.

The present inventory is a compendium of information on roads derived from Universal Transverse Mercator Maps, forest harvesting company records, topographic maps, highway maps, seismic trail files, Parks and Renewable Resources files and from field and other investigations. It is hoped that this manual composition can be adapted into a future, elaborate Geographic Information System. Regardless, if future information updates are done manually or with the assistance of a computer, old, deteriorating roads may be deleted from the existing maps while new roads can be added to the list.

This project received the collective support of all SPRR sectors. I hope that all staff will find the maps as useful in their work routine as we do in the Wildlife Branch.

Any comments, criticism, and suggestions from my fellow workers on ways to improve this road inventory would be most welcome.
